

AVERE-EUROPE WIRELESS POWER TRANSFER WEBINAR

JULY 1ST 2020

PRESENTATION AGENDA

1. Standardization

- a. Role of standardization
- b. Which standards deal with wireless power transfer
- c. What can be found in these standards
- d. Europe and wireless power transfer
- e. IEC 63243: the new dynamic wireless power transfer standardization project

2. New H2020 research project: INCIT-EV

- a. Introduction
- b. Consortium
- c. Project overview
- d. Work package structure
- e. Methodology

A – ROLE OF STANDARDIZATION

B – WHICH STANDARDS DEAL WITH WIRELESS POWER TRANSFER

1 WPT

- Complete system: SAE J 2954
GB/T 38775 series
- Infrastructure : IEC 61980 series
- EV : ISO 19363

2 Communication

- ISO 15118
- SAE J 2847-6
- GB/T 38775.2

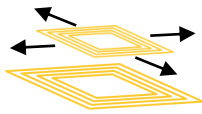

2 Communication

From convergence documents
to real industrial standards
SAE J 2954: August 2020 (TIR → Standard)
IEC 61980 : May/Sept 2021 (TS → Standards)

C – WHAT CAN BE FOUND IN THESE STANDARDS

Power transfer

Power / Efficiency  Alignment tolerance 

 Coil distance

Interoperability requirements and test procedures

WPT Power Class		
WPT1	WPT2	WPT3
3,7 kVA	7,7 kVA	11,1 kVA

Ground Clearance	
Z1	100-150 mm
Z2	140-210 mm
Z3	170-250 mm

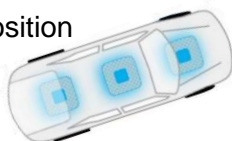

Alignment

Fine positioning  Pairing 

 Alignment check

Alignment requirements and test procedures

Vehicle integration

Coil position  Coil size 

Coil size and position requirements

Safety

Live object protection / EMF  Foreign object detection  Electrical shock 

Safety requirements and test procedures

D – EUROPE AND WIRELESS POWER TRANSFER

- M/533 Commission implementing decision on standardization request to CEN/CENELEC/ETSI

APPENDIX I REQUESTED WORK PROGRAMME	
Reference information	Publication ²⁸
I European standards (ENs) on electricity supply	
1. A European standard containing technical specifications with a single solution for wireless recharging for passenger cars and light duty vehicles interoperable with the specification contained in IEC/TS 61980-3 Ed. 1.0 or its later edition	31/12/2019

- On-going activities regarding emission test levels to respect in Europe

- Technical meeting scheduled with ECC SE 24 on the 7th of July at 2pm in order to review test procedures and measured data.
- Meeting open to everybody, registration required on CEPT website

E – IEC 63243: THE NEW DWPT STANDARDIZATION PROJECT

- **A new project regarding dynamic wireless power transfer**
 - Convener: Professor Uooyeol Yoon (KAIST)
 - Kick-off meeting in June 2019
 - Next meeting will be hold by Israel (Electreon), October 13~15th, 2020

- **Standard with the same technical scope as for static: interoperability and safety**

But

- **Proposition to create interoperability Testing Symposium in the same way as for ISO 15118**

C – PROJECT OVERVIEW

INCIT-EV aims to demonstrate, at five demonstration environments including TENT-T corridors, an innovative set of charging infrastructures, technologies and its associated business models, ready to improve the EV users experience by considering both their conscious and unconscious preferences in their design, with the ultimate goal of fostering the EV market share in the EU.
